CTO Highly Recommends LinkTrust Due to World Class Support and Industry Leading Uptime

"We work in the payday debt settlement and subprime industries. Started to branch out into other leadgen industries as of late. I've been in technology sales and marketing since the early 80's and worked exclusively online since 1999. We've been using Linktrust since 2008. Overall experience has been exceptional with LinkTrust. Uptime has been phenomenal and I have not experienced downtime and is they set the industry standard.

Support has been amazing and I am able to get in touch with a support representative within minutes and sometimes even seconds.

We really like using the pixel to pixel tracking and QR code tracking for real world placement. They were able to implement this for us around 2012. We have stayed with LinkTrust for so long because there's no reason to leave and no reason to switch. Some of the other well known systems have some technological challenges that aren't really talked about.

LinkTrust is an awesome company and a really great group to work with. I would highly recommend using LinkTrust."

 - Geoff Clay - Go Green Services CTO
